

Whitewater Courses & Parks 2010

Making It Happen and Making It Work!

Salida, Colorado, USA
May 24 – 27, 2010

TITLE OF CONFERENCE PAPER

D. Shepherd¹, R. Shimoda² and G. Post¹

1. Northwest Hydraulic Consultants Ltd., Edmonton, AB, Canada, dshepherd@nhc-edm.com

2. The Shimoda Group, LLC, Takoma Park, MD, USA, risa@theshimodagroup.com

ABSTRACT: This template document provides an example of the preferred format of full papers for the 2010 Whitewater Courses & Parks (WCP) Conference, including the appropriate paper heading that is given above. This page is a sample first page of the paper; the next page is a sample of all subsequent pages. The abstract should not exceed 300 words and should not include any illustrations. **The completed paper shall not exceed eight (8) pages, including figures, tables, photos, etc.**

1. INTRODUCTION

The Conference Proceedings will be prepared from an electronic file document supplied by the author(s). To ensure publication quality and uniformity, the following requirements have been prepared to assist authors in preparing papers for the Conference. We kindly ask that you abide by the formatting and instructions provided in this template to prepare your conference paper(s) as doing so will reduce the amount of time required for the publisher to convert and copy your paper(s) into the Conference Proceedings.

Please submit one (1) electronic file document of the full paper as a Microsoft® Word document by email to risa@theshimodagroup.com. **The deadline for submission of conference papers is April 16, 2010.**

2. PAGE NUMBERS

Page numbers will be specified during publishing of the Conference Proceedings. Please use the page numbers as provided in this template and do not add, delete or edit any settings.

3. EQUATIONS, FORMULAE, SYMBOLS AND UNITS

Type all equations and formulas from the left margin (do not center in the page) and number them consecutively. Equation numbers should be placed flush at the left margin in square brackets. Refer to equations in the body of text by these numbers (e.g. “Eq. 1” or “Equation 1 shows...”). Use Imperial units and Arabic numerals, but do not use italics. An example equation is shown below:

$$[1] \quad \sigma = P/A$$

4. ILLUSTRATIONS

4.1. General

Number illustrations (whether drawings or photographs) consecutively in the order of appearance and refer to them as Figure 1, Figure 2 to 4, etc. Illustrations should be placed as close as possible to where they are first referenced in the text. Avoid placing illustrations sideways on a page; however, if this is not possible, no other text should appear on that page. Photographs should be of good quality contrast. Figure

lettering should be approximately the same size as the text. Make sure that illustrations borrowed or adapted from another source are properly acknowledged.

Captions should be placed immediately below the illustration and centered on the page. An example figure caption is shown below:

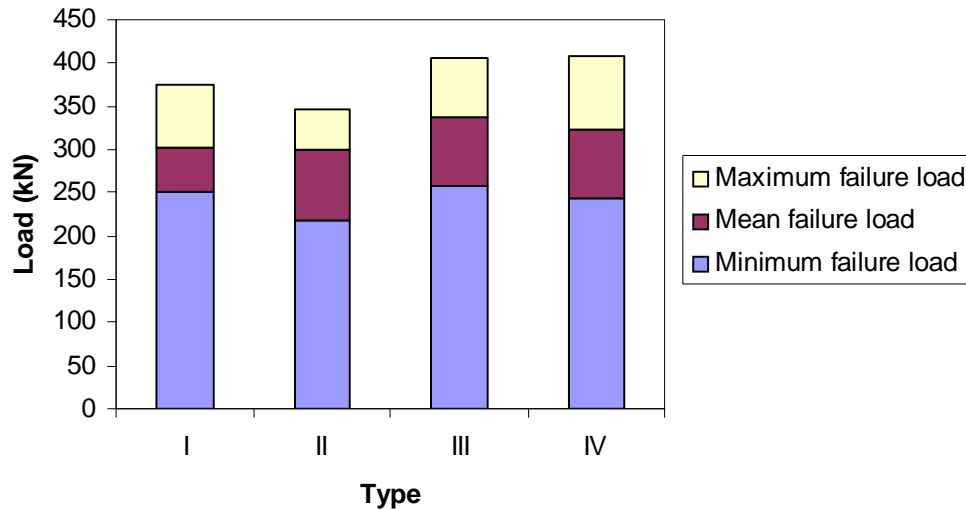

Figure 1: Deflection of a plate subjected to a uniform temperature rise.

4.2. Tables

Number tables consecutively in order of appearance and place them as close as possible to where they are first referenced in the text. Refer to tables as Table 1, or Tables 1 and 2, in the body of the text.

Type the caption above the table, and do not leave a line space between the table caption and the table. Both the table and the caption should be centered on the page.

Avoid abbreviations in column headings (other than units). Indicate units in the line immediately below the heading. Omit vertical lines used as separators between columns in the table.

Table 1. Sample table for the 2010 Whitewater Courses & Parks Conference.

Title	Title	
	Sub-title (units)	Sub-title (units)
Line 1	1234	4321
Line 2	1324	3411
Line 3	1321	8765

5. REFERENCES

Within the body of the text, references should be made in parenthesis with the authors' surnames and the year of publication such as (Seed, et al., 1977). At the end of the paper, list all references in alphabetical order of the first author's surname. The first line of each entry in the reference list should not be indented; the following lines should have a two-space (10 point) indentation. Do not leave an open line between references. Type the book titles and names of journals, reports and conferences in *italics*.

The **format for referenced books** is: Last name, Initials. Year. *Book Title*, Publisher, City, State/Province, Country (of publisher). For example:

Terzaghi, K. and Peck, R.B. 1987. *Soil Mechanics in Engineering Practice*. 2nd ed., McGraw Hill, New York, NY, USA.

The **format for referenced journal papers** is: Last name, Initials. Year. Article Title. *Name of Journal*, volume number in Arabic numerals, pages. For example:

Ingold, T.S. and Miller, K.S. 1983. Drained Axisymmetric Loading of Reinforced Clay. *Journal of Geotechnical Engineering*, ASCE, 109: 883-898.

The **format for referenced conference papers** is: Last name, Initials. Year. Article Title. *Name of conference*, Publisher, City, State/Province and Country where conference took place, volume number in Arabic numerals: pages. For example:

Leshchinsky, D. and Perry, E.B. 1987. A Design Procedure for Geotextile Reinforced Walls. *Geosynthetics '87*, IFAI, New Orleans, LA, USA, 1: 95-107.
